

Storm Data and Unusual Weather Phenomena - May 2009

| Location | Date/Time | Deaths & Injuries | Property & Crop Dmg | Event Type and Details |
|----------|-----------|-------------------|---------------------|------------------------|
|----------|-----------|-------------------|---------------------|------------------------|

ARKANSAS, Central and North Central

| | | | | |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---|----|---------------------------|
| INDEPENDENCE COUNTY --- 1.5 WNW TURKEY HILL [35.88, -91.27], 3.1 ENE TURKEY HILL [35.89, -91.20], 3.4 SSE TURKEY HILL [35.82, -91.23], 2.9 NNE PAROQUET [35.71, -91.35], 2.9 SE PAROQUET [35.65, -91.33], 1.6 SW PAROQUET [35.66, -91.39], 2.9 S DOTA [35.76, -91.38] | 05/01/09 00:01 CST | 0 | 0 | Flood (due to Heavy Rain) |
| | 05/27/09 22:00 CST | | 1M | Source: Public |

Heavy rainfall in May pushed the Black River stage at Black Rock to more than 8 feet above flood stage. Over bank flooding caused the newly planted soybean crop to fail and also flooded and destroyed a number of acres of a standing corn crop. As many as 24,000 acres of row crops were flooded, but not all were planted. Losses of 5,000 acres of soybeans were estimated, along with 1,000 acres of corn. High water also delayed the initial planting of the remainder of the area. Rice planting was delayed, which can impact final yields. Arkansas Highway 37 near Cord was also flooded for more than a week.

| | | | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---|-------|---------------------------|
| JACKSON COUNTY --- 0.5 SSE JACKSONPORT [35.62, -91.31], 0.7 WSW DIAZ [35.63, -91.28], 1.1 WNW NEWPORT [35.61, -91.29], 2.1 W NEWPORT [35.60, -91.31], 2.1 SSW NEWPORT [35.57, -91.28], 0.3 NW SPRIGGS MILL [35.45, -91.32], 1.7 SSE GRAND GLAISE [35.45, -91.41], 1.4 NNE OLYPHANT [35.54, -91.37] | 05/01/09 00:01 CST | 0 | 0 | Flood (due to Heavy Rain) |
| | 05/31/09 23:59 CST | | 0.20M | Source: Public |

While the stage of the White River did not exceed flood stage at Newport, over bank flooding caused the destruction of thousands of acres of a young soybean crop. A stage in excess of 12 feet begins to break out into row crops and 16 to 21 feet covers a large area of the flood plain. Stages at Newport varied from 14 to 23 feet during the month of May. As many as 30,000 acres could have been impacted with crop plantings delayed or young crops destroyed.

| | | | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---|-------|---------------------------|
| JACKSON COUNTY --- 5.3 N CENTERVILLE [35.88, -91.21], 3.9 NNW SWIFTON [35.87, -91.16], 0.6 E ELGIN [35.75, -91.29], 1.1 NNE JACKSONPORT [35.64, -91.31], 1.8 SW REAMEY [35.66, -91.35], 3.4 SW ELGIN [35.72, -91.35] | 05/01/09 00:01 CST | 0 | 0 | Flood (due to Heavy Rain) |
| | 05/31/09 23:59 CST | | 0.50M | Source: Public |

The Black River at Black Rock was more than 8 feet above flood stage. This caused flooding downstream in Jackson County with more than 20 thousand acres of row crop farmland flooded. Perhaps as many as 5,000 acres of newly planted soybeans, at a cost of more than \$50 per acre, were lost. Damages could be counted at double that value due to re-plant costs.

| | | | | |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---|-------|---------------------------|
| PRAIRIE COUNTY --- 1.8 E ENARC [35.03, -91.52], 0.2 WNW LOST HILL [35.03, -91.43], 1.6 W ERWIN [34.97, -91.46], 1.7 WNW PLUNKETTS [34.91, -91.43], 4.6 SE BISCOE [34.77, -91.35], 4.0 ENE VABY [34.72, -91.41], 0.8 N MESA [34.79, -91.48] | 05/01/09 00:01 CST | 0 | 0 | Flood (due to Heavy Rain) |
| | 05/31/09 23:59 CST | | 0.10M | Source: Public |

Areas within the White River levees in Prairie County were flooded for most of the month of May. Several thousand acres of crop land were impacted by the high stages and crop plantings were delayed. About 2,000 acres of young soybeans were destroyed.

| | | | | |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---|-------|---------------------------|
| WHITE COUNTY --- 1.8 ENE ANDREWS [35.19, -91.54], 3.3 NE WATKINS [35.18, -91.44], 4.3 S GEORGETOWN [35.06, -91.44], 5.5 SW GEORGETOWN [35.06, -91.51] | 05/01/09 00:01 CST | 0 | 0 | Flood (due to Heavy Rain) |
| | 05/31/09 23:59 CST | | 0.15M | Source: Public |

About 15,000 acres of cropland flooded in White County in the area below the Little Red River. The stage of the White River at Georgetown was above flood stage from the 7th to the 19th of May. Some newly planted soybeans were lost and replanting was delayed due to the high river stage.

| | | | | |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---|-------|---------------------------|
| WHITE COUNTY --- 2.9 N RIO VISTA [35.32, -91.47], 0.8 NE RIO VISTA [35.29, -91.46], 3.1 SE NORTONS CORNER [35.20, -91.51], 4.4 ENE WATKINS [35.18, -91.41], 5.0 E RIO VISTA [35.28, -91.38], 5.0 NNE RIO VISTA [35.35, -91.44], 7.1 ENE BRADFORD [35.44, -91.35], 4.0 ENE BRADFORD [35.45, -91.41] | 05/01/09 00:01 CST | 0 | 0 | Flood (due to Heavy Rain) |
| | 05/31/09 23:59 CST | | 0.30M | Source: Public |

High stages on the White River caused crop damages. The White River stage at Augusta remained above flood stage all month. The White River stage at Georgetown remained above flood stage from May 7th to 19th. Young soybean crops were destroyed and new plantings delayed.

| | | | | |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|---|-------|---------------------------|
| WOODRUFF COUNTY --- 6.6 NW PLEASANT GROVE [35.45, -91.35], 6.6 NW AUGUSTA [35.36, -91.44], 2.9 SSW RUFFWOOD [35.23, -91.38], 4.8 SW MC CLELLAND [35.05, -91.46], 3.2 SSW MC CLELLAND [35.06, -91.42], 3.3 NW GREGORY [35.19, -91.37], 1.1 NW FITZHUGH [35.36, -91.33], 5.2 NNW PLEASANT GROVE [35.45, -91.30] | 05/01/09 00:01 CST | 0 | 0 | Flood (due to Heavy Rain) |
| | 05/31/09 23:59 CST | | 0.20M | Source: Public |

Storm Data and Unusual Weather Phenomena - May 2009

| Location | Date/Time | Deaths & Injuries | Property & Crop Dmg | Event Type and Details |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-------------------|---------------------|--------------------------------------|
| <p>More than 20,000 acres of row crops were flooded in Woodruff County during the month of May. As many as 5,000 acres were planted in soybeans.</p> <p>Much above normal rainfall occurred in May, which led to river flooding along the White and Black Rivers. Crop losses were reported by farmers in eastern Arkansas.</p> <p>Clarendon set a record for the wettest May ever recorded in the city.</p> | | | | |
| <hr/> | | | | |
| NEWTON COUNTY --- 1.6 NNW WALNUT [35.80, -93.36], 1.6 N WALNUT [35.80, -93.34] | 05/01/09 19:27 CST | | 10K | Tornado (EF0, L: 0.66 mi , W: 50 yd) |

| 05/06/09 12:00 CST | 0.25M | Flood (due to Heavy Rain) |
| 05/18/09 12:00 CST | 0 | Source: NWS Employee |

Heavy rainfall in the basin pushed the Saline River at the gage near Rye above flood stage for most of the month of May. Numerous recreational cabins and primary residences were impacted by inundation or isolation. County and state roads also suffered damage. The crest at the gage was the 6th highest of record and the highest stage since 1987.

DREW COUNTY --- 8.2 WSW CARPENTER [33.39, -91.99], 6.2 W CARPENTER [33.40, -91.96], 4.9 WSW GREEN HILL [33.54, -91.98], 6.9 WSW GREEN HILL [33.54, -92.01], 9.0 WSW NEW HOPE [33.46, -92.01]

Within Drew County, flooding of the Saline River damaged roads and impacted cabins along the river. A few structures were impacted north of the Longview community at the Arkansas Highway 8 bridge, near Gee's Landing, and Ozment Bluff. About 3 to 5 structures were impacted by the high river stages. County roads in the flood plain of southwest Drew county were also impacted.

BRADLEY COUNTY --- 6.0 NNW HARMONY [33.71, -92.06], 2.1 NE WARREN MUNI ARPT [33.59, -92.05], 1.1 NE JOHNSVILLE [33.38, -92.01], 0.9 SSE BROAD [33.27, -92.06], 2.5 ESE BROAD [33.27, -92.03], 4.9 SSE JOHNSVILLE [33.31, -91.97], 3.7 E JOHNSVILLE [33.38, -91.96], 7.6 N HARMONY [33.74, -92.00]

| 05/07/09 12:00 CST | 0.40M | Flood (due to Heavy Rain) |
| 05/19/09 12:00 CST | 0 | Source: NWS Employee |

Within Bradley County, flooding of the Saline River damaged roads and impacted cabins and residences along the river. Major impacts were noted in the Longview community in southeastern Bradley County at the Arkansas Highway 8 bridge. As many as 25 structures were impacted by the high river stages.

Record rainfall caused river flooding in southwest Arkansas. The Ouachita River and tributaries experienced the highest stages since 1990 and caused Lake Greeson to go over the uncontrolled spillway for only the second time in the history of the reservoir. The last episode for a spill occurred in 1968.

Murfreesboro, Malvern, Leola, and Fordyce set new records for the wettest May ever recorded in those cities.

In a subdivision of more than 40 homes, high stages on the Arkansas River cut off access for most of the month. There were two homes that received water damage.

Excessive rainfall in May pushed the Arkansas River stage above flood stage at Pine Bluff. Homes in the Island Harbour Subdivision were impacted by inundation or isolation by the Arkansas River.

| Water covered U.S. Highway 70 west of Kirby. | | | | |
| <p>A round of excessive rain occurred on the 12th as a warm front lifted into the state from the Gulf Coast. Yet another cold front was poised to the north during the afternoon of the 13th. Strong to severe storms worked into northern and central Arkansas during the overnight hours early on the 14th. High pressure built over the region, and brought dry and warm weather through the 15th. The high exited to the west by the 16th, and created a northwest wind flow aloft. This drove a new cold front and scattered thunderstorms into the state.</p> | | | | |

Flooding occurred on county roads in the western half of the county. One residence was surrounded by water west of Arkansas Highway 223. Water entered the Viola City Hall.

Heading into the 27th, a cold front began pushing through Arkansas from the Plains. Thunderstorms bubbled up ahead of the front. Some storms became severe during the afternoon, mainly in central and eastern sections of the state.
